27 December 2025 - 30 January 2026

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

The 10 Dashboards in This Analytics Suite -

- Executive Financial Performance & Growth
- Wealth Management Performance
- Investment Banking Revenue & Deal Pipeline
- Trading Performance & Market Risk
- Client Profitability & Lifecycle Analysis
- Advisor & Desk Productivity
- Portfolio Allocation Insights
- Client Experience & Engagement
- Compliance, AML & Operational Risk
- Client-Level Drill-Through Analytics

Each dashboard addresses a specific business function while remaining connected within a single enterprise analytics framework.

Data Disclaimer

This project is based on a large synthetic financial dataset (~100,000 records) designed to simulate real-world enterprise financial scenarios.

10 Power BI Dashboards. One Enterprise View of MORGAN STANLEY

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

1. Executive Financial Performance & Growth

This dashboard presents an enterprise-level view of financial performance, growth drivers, operational efficiency, and risk exposure, serving as the strategic entry point to the entire analytics suite.

What this dashboard enables

- Provides a top-level view of overall business performance across revenue, AUM, and net flows
- Monitors monetization efficiency and cost discipline at an enterprise scale
- Assesses regional and business-line contribution to firm-wide growth
- Integrates risk awareness through AML-adjusted performance and efficiency metrics
- Enables seamless navigation to all other dashboards for deeper, domain-specific analysis

Primary stakeholders

- Executive leadership and C-suite
- Corporate strategy and planning teams
- Senior operations and finance leaders
- Enterprise risk and governance teams

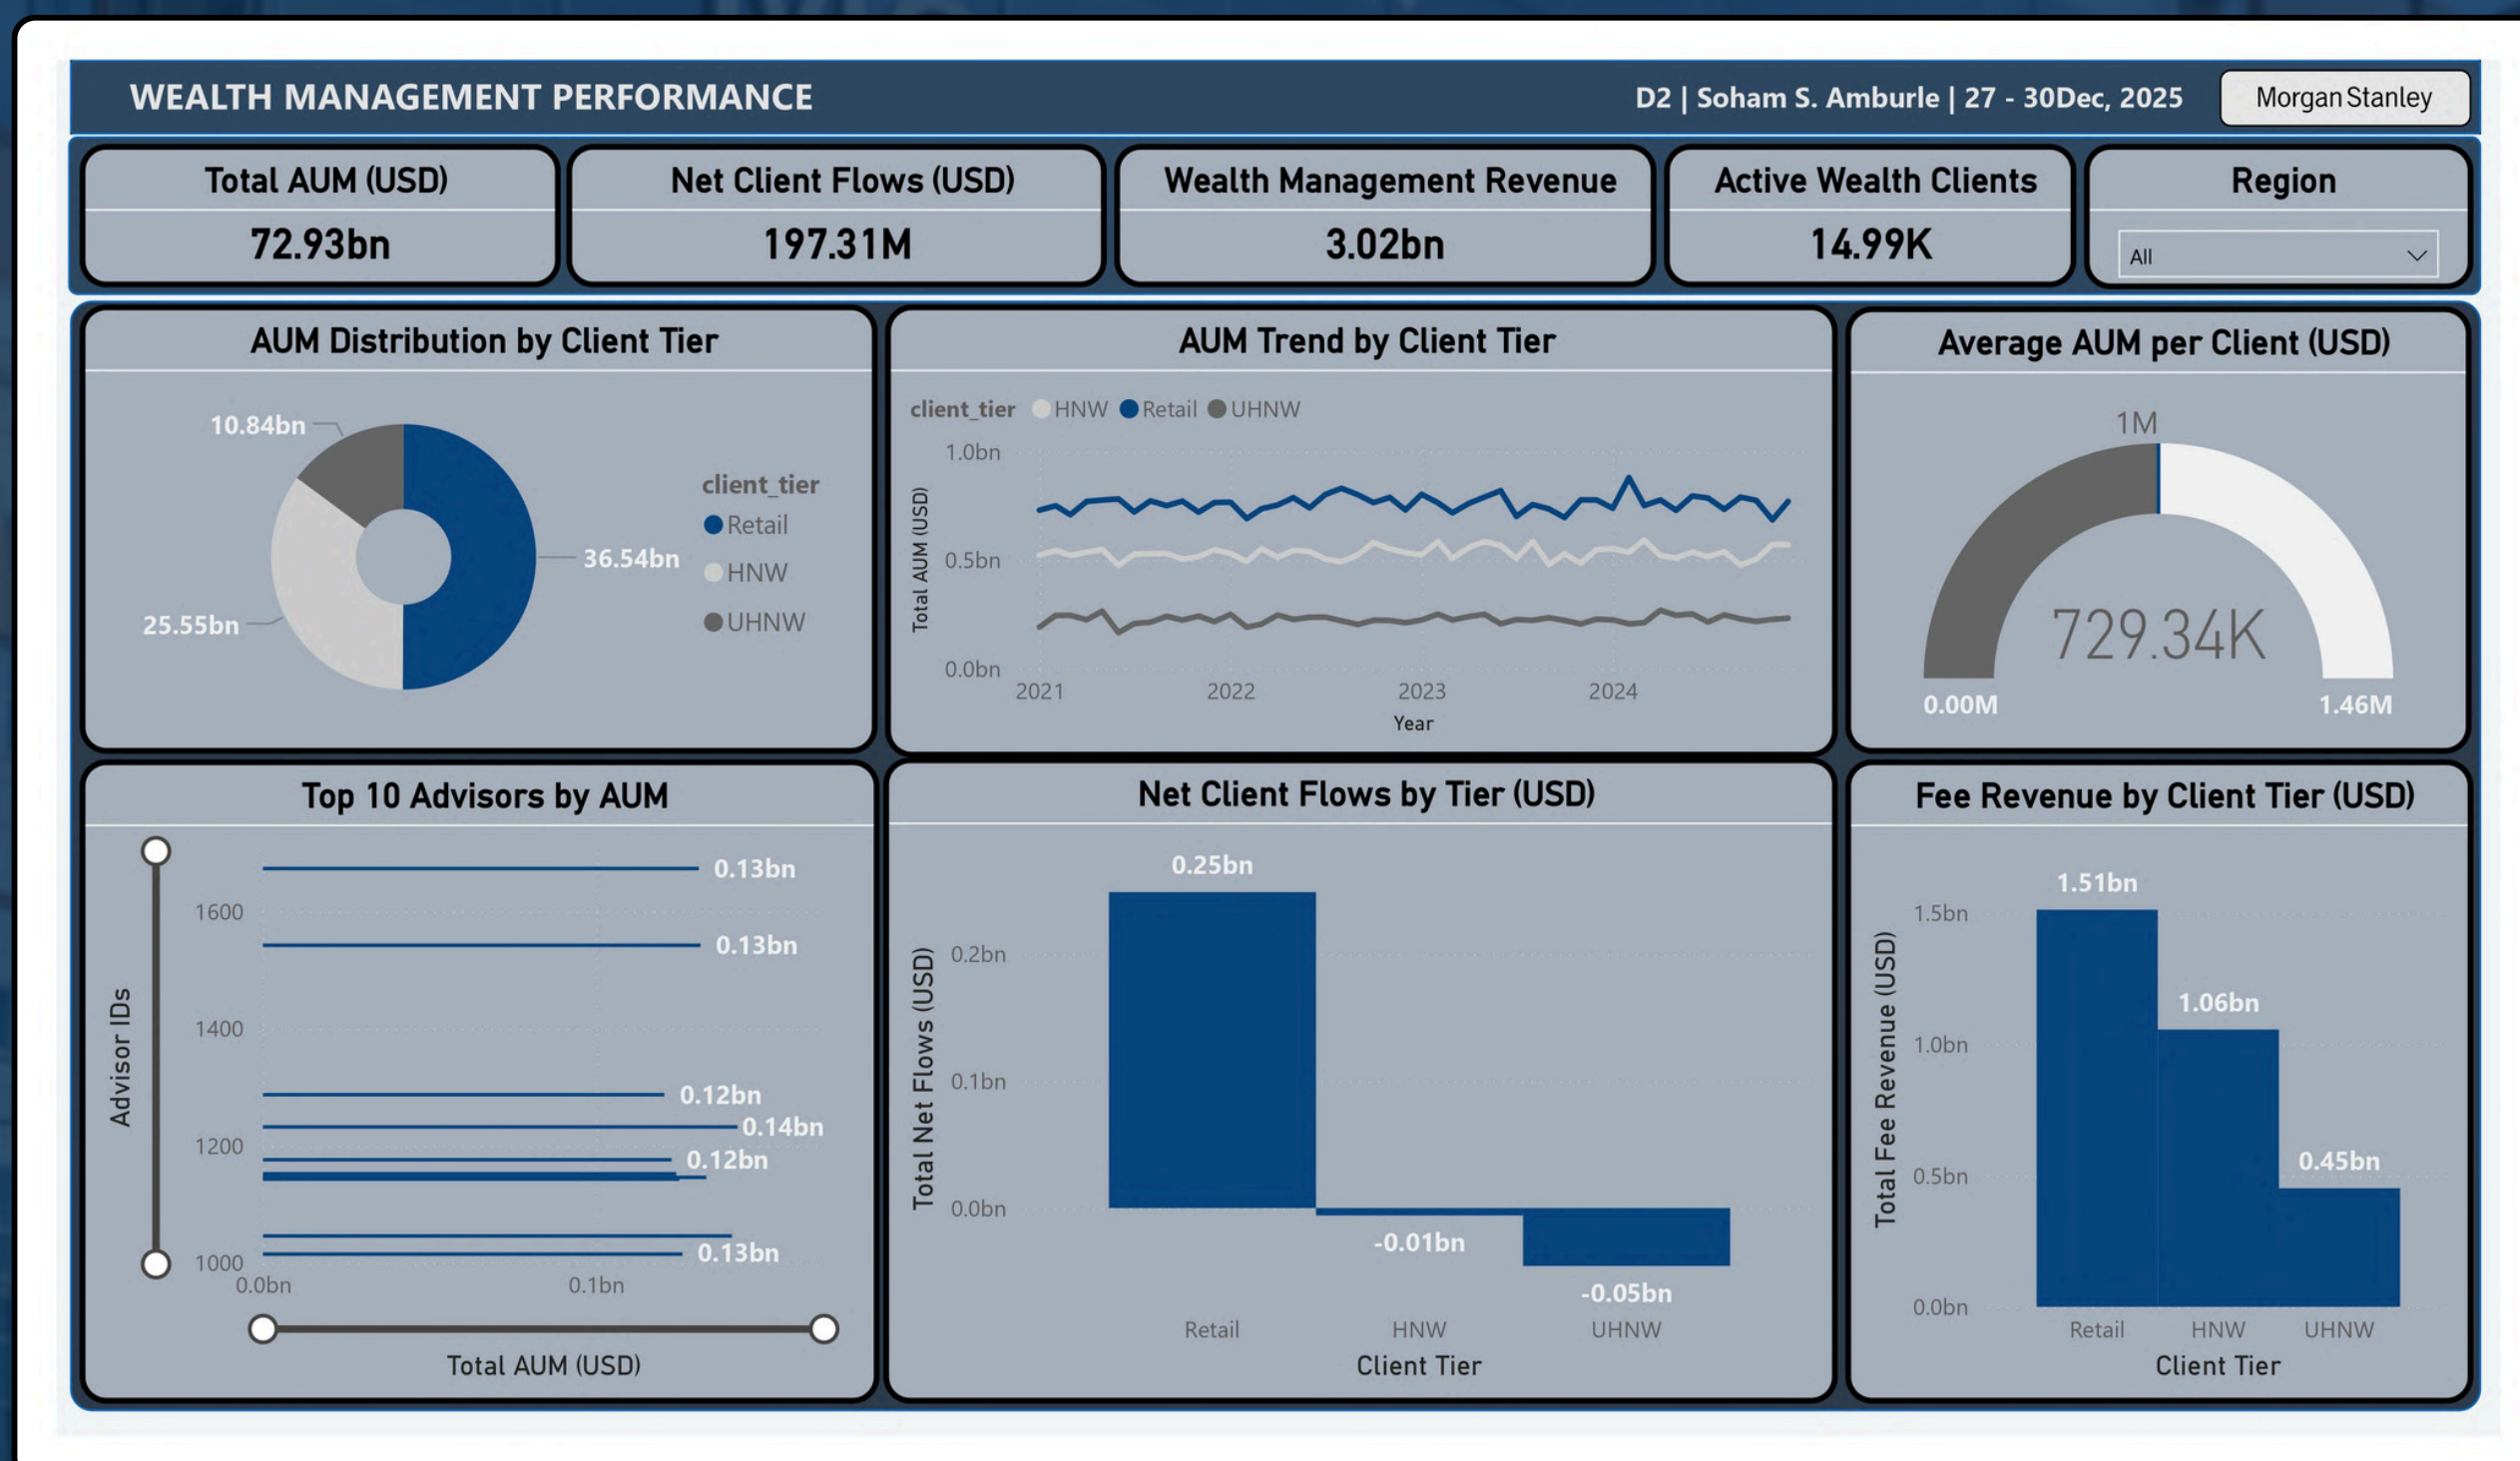

SOHAM S. AMBURLE

10 Power BI Dashboards. One Enterprise View of MORGAN STANLEY

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

2. Wealth Management Performance

This dashboard presents a consolidated view of wealth management performance across AUM, client segments, advisors, and revenue.

What this dashboard enables

- Tracks AUM growth and client inflow/outflow patterns
- Analyzes asset distribution across client tiers
- Measures advisor performance and revenue contribution
- Evaluates wealth revenue drivers by region and segment

Primary stakeholders

- Wealth management leadership
- Regional business heads
- Advisor performance and analytics teams
- Strategic planning teams

27 December 2025 - 30 January 2026

10 Power BI Dashboards. One Enterprise View of MORGAN STANLEY

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

3. Investment Banking Revenue & Deal Pipeline

This dashboard presents investment banking revenue trends, client and regional contribution, and associated risk exposure.

What this dashboard enables

- Monitors investment banking revenue trends over time
- Analyzes revenue concentration by region and client tier
- Evaluates revenue stability and volatility
- Assesses AML risk exposure alongside revenue generation

Primary stakeholders

- Investment banking leadership
- Regional and sector heads
- Risk and compliance teams
- Corporate strategy stakeholders

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

4. Trading Performance & Market Risk

This dashboard presents trading revenue performance, desk-level productivity, growth momentum, and risk-adjusted outcomes.

What this dashboard enables

- Tracks trading revenue growth and regional performance
- Compares desk-level revenue and efficiency
- Evaluates revenue against weighted risk exposure
- Measures progress against trading revenue targets

Primary stakeholders

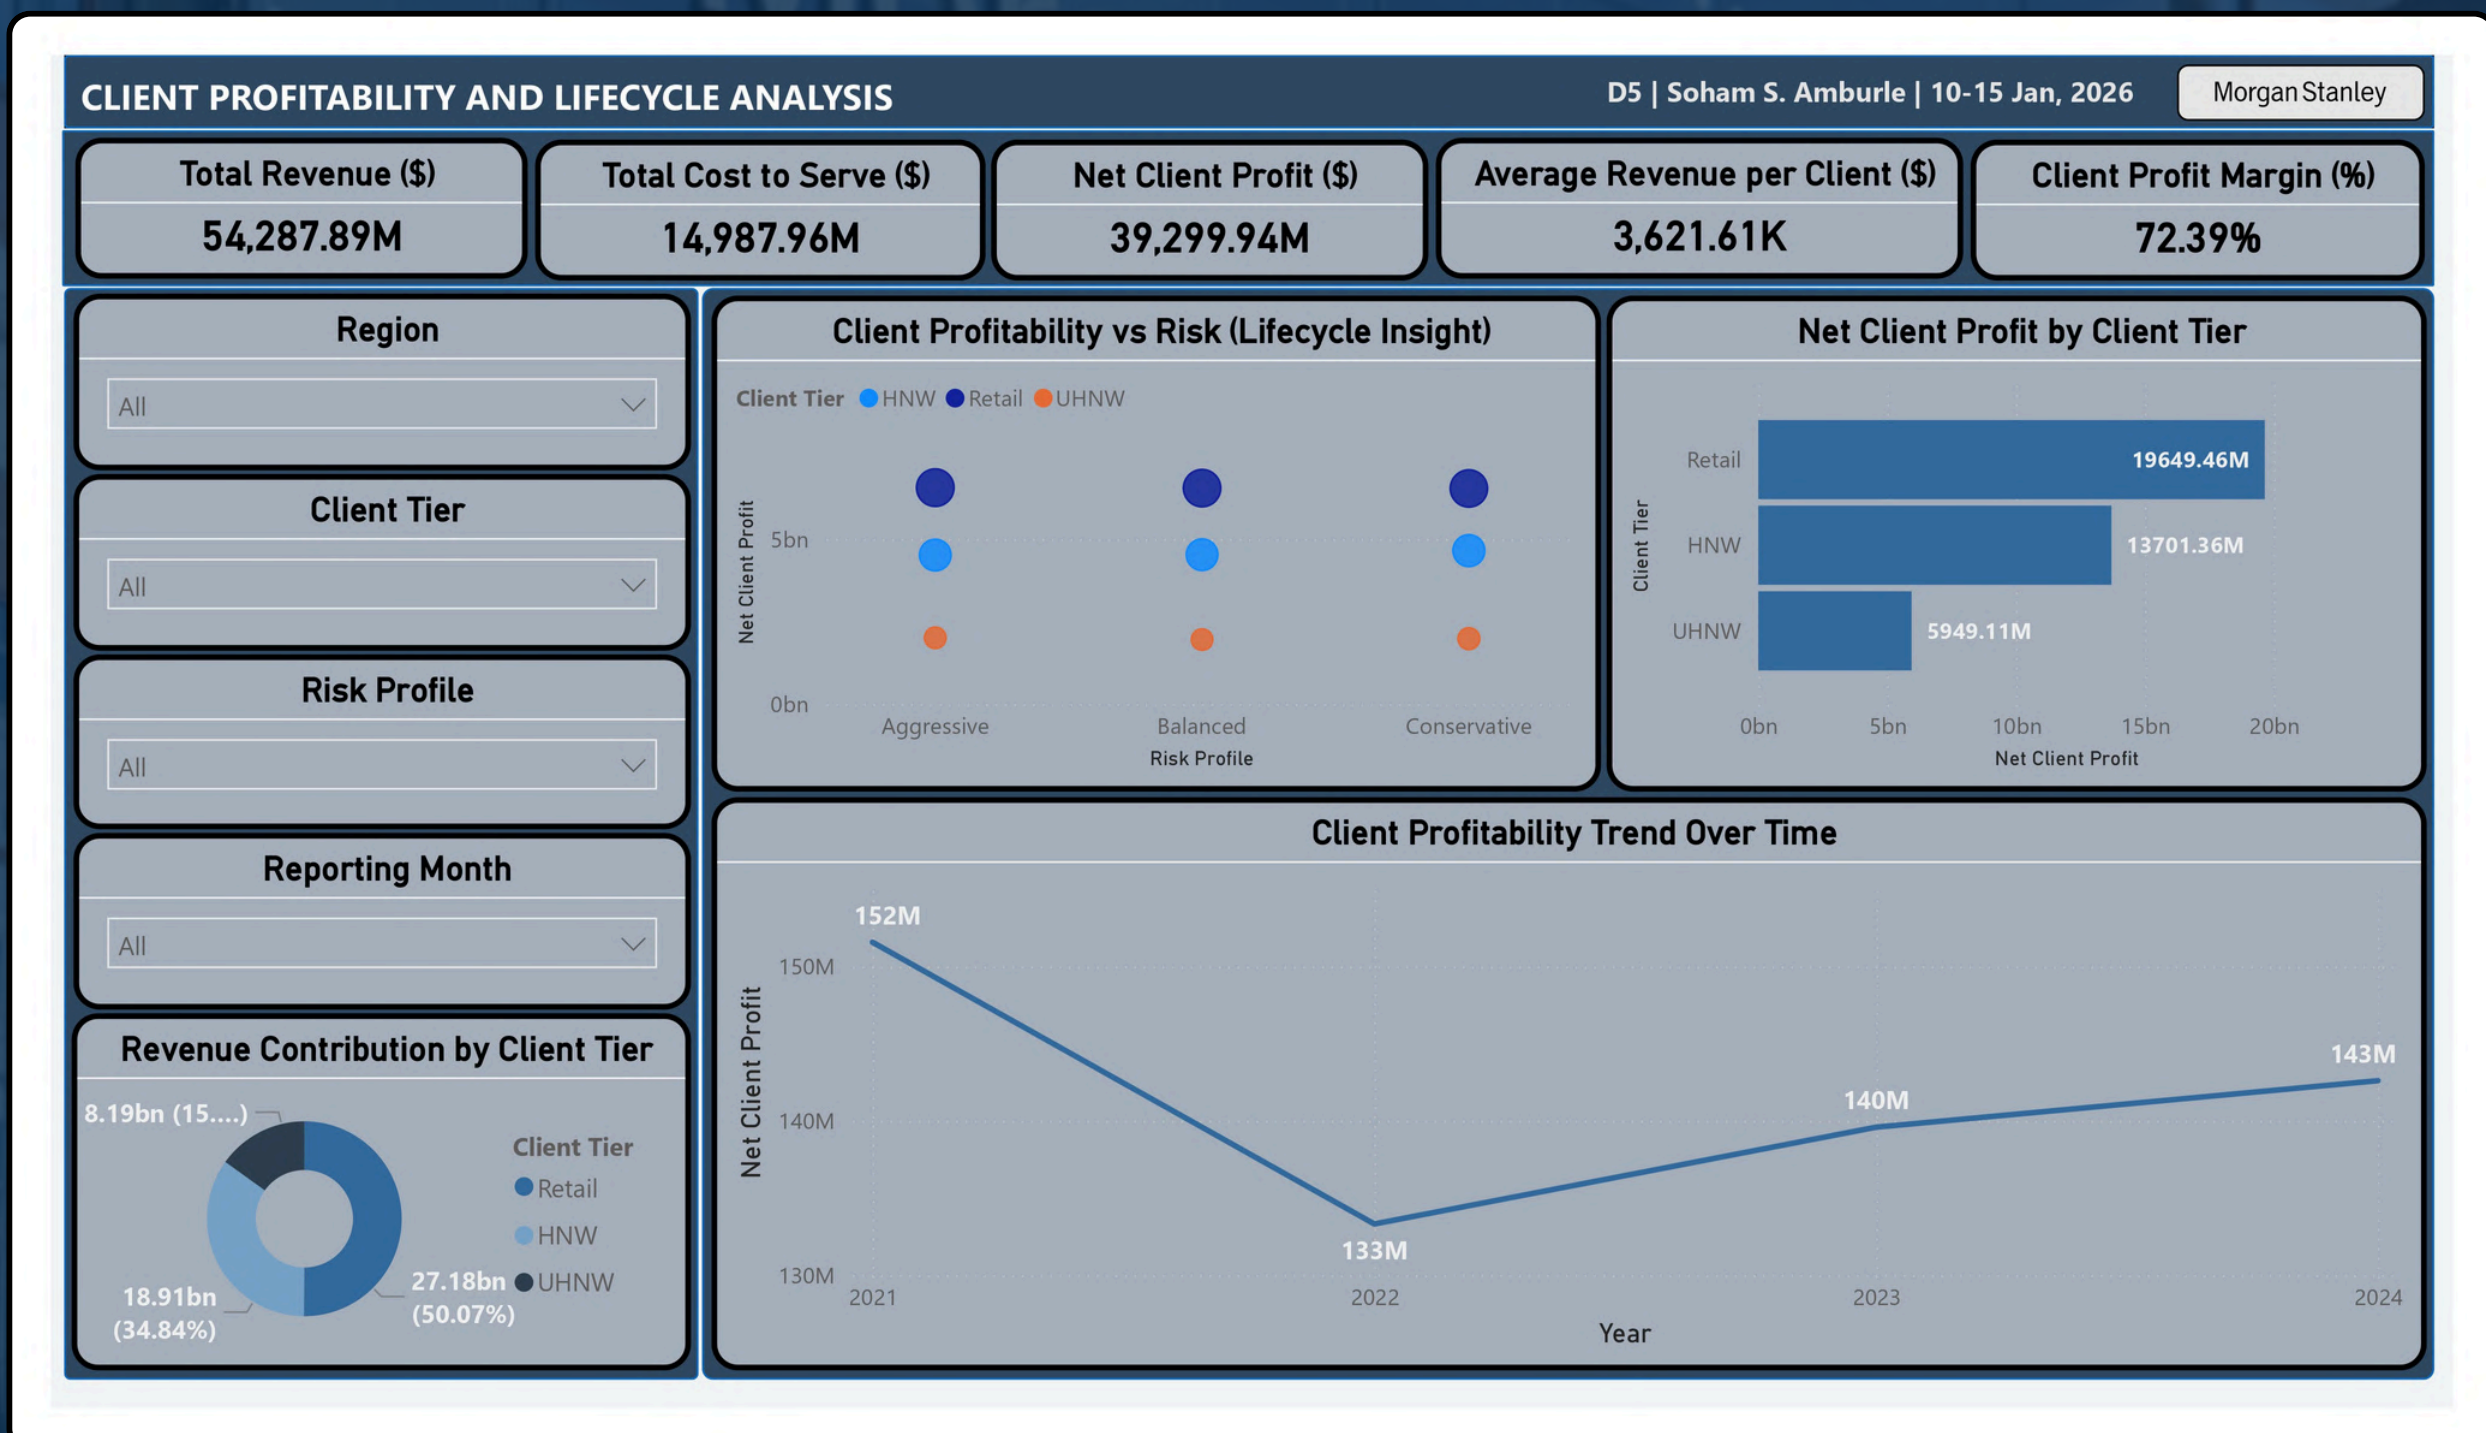

- Trading and markets leadership
- Desk heads and regional managers
- Risk and compliance teams
- Performance management teams

27 December 2025 - 30 January 2026

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

5. Client Profitability & Lifecycle Analysis

This dashboard presents true client profitability after costs and how it evolves across the client lifecycle.

What this dashboard enables

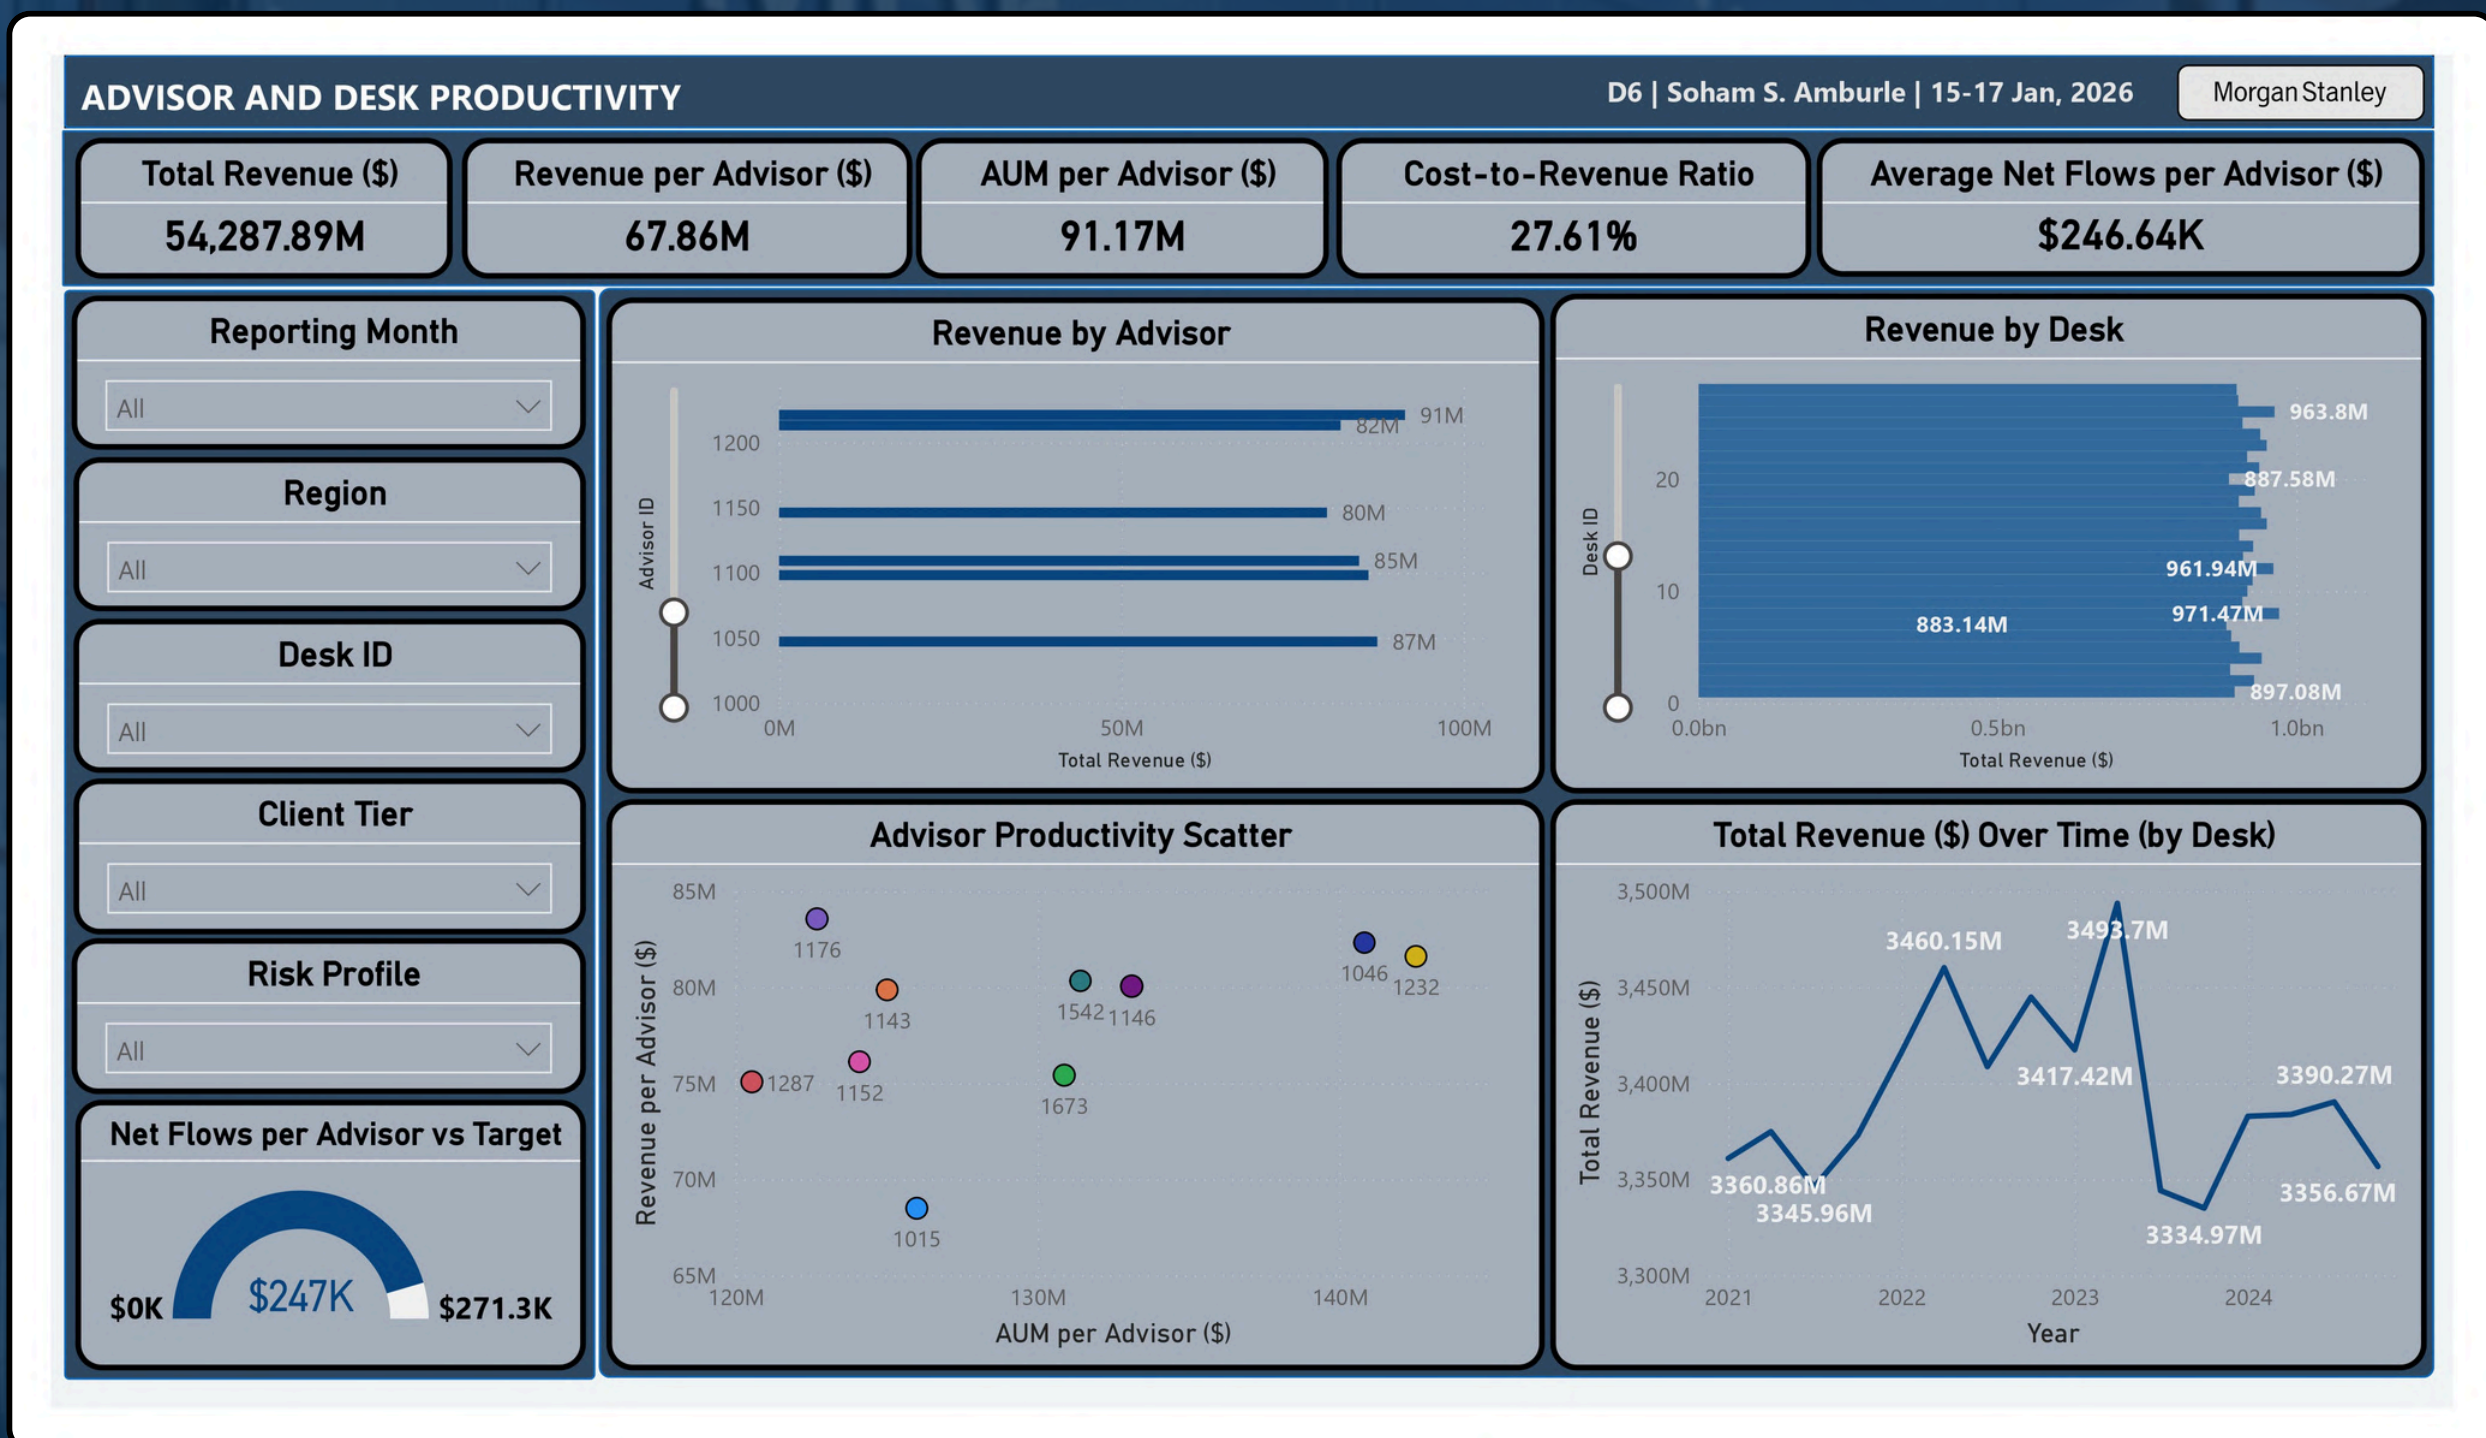

- Measures net client profitability after servicing costs
- Identifies high-value and underperforming client segments
- Evaluates risk versus return at the client level
- Tracks profitability trends across the client lifecycle

Primary stakeholders

- Senior leadership
- Relationship and client strategy teams
- Wealth and investment management heads
- Operations and cost management teams

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

6. Advisor & Desk Productivity

This dashboard presents advisor- and desk-level productivity across revenue, AUM, net flows, and cost efficiency.

What this dashboard enables

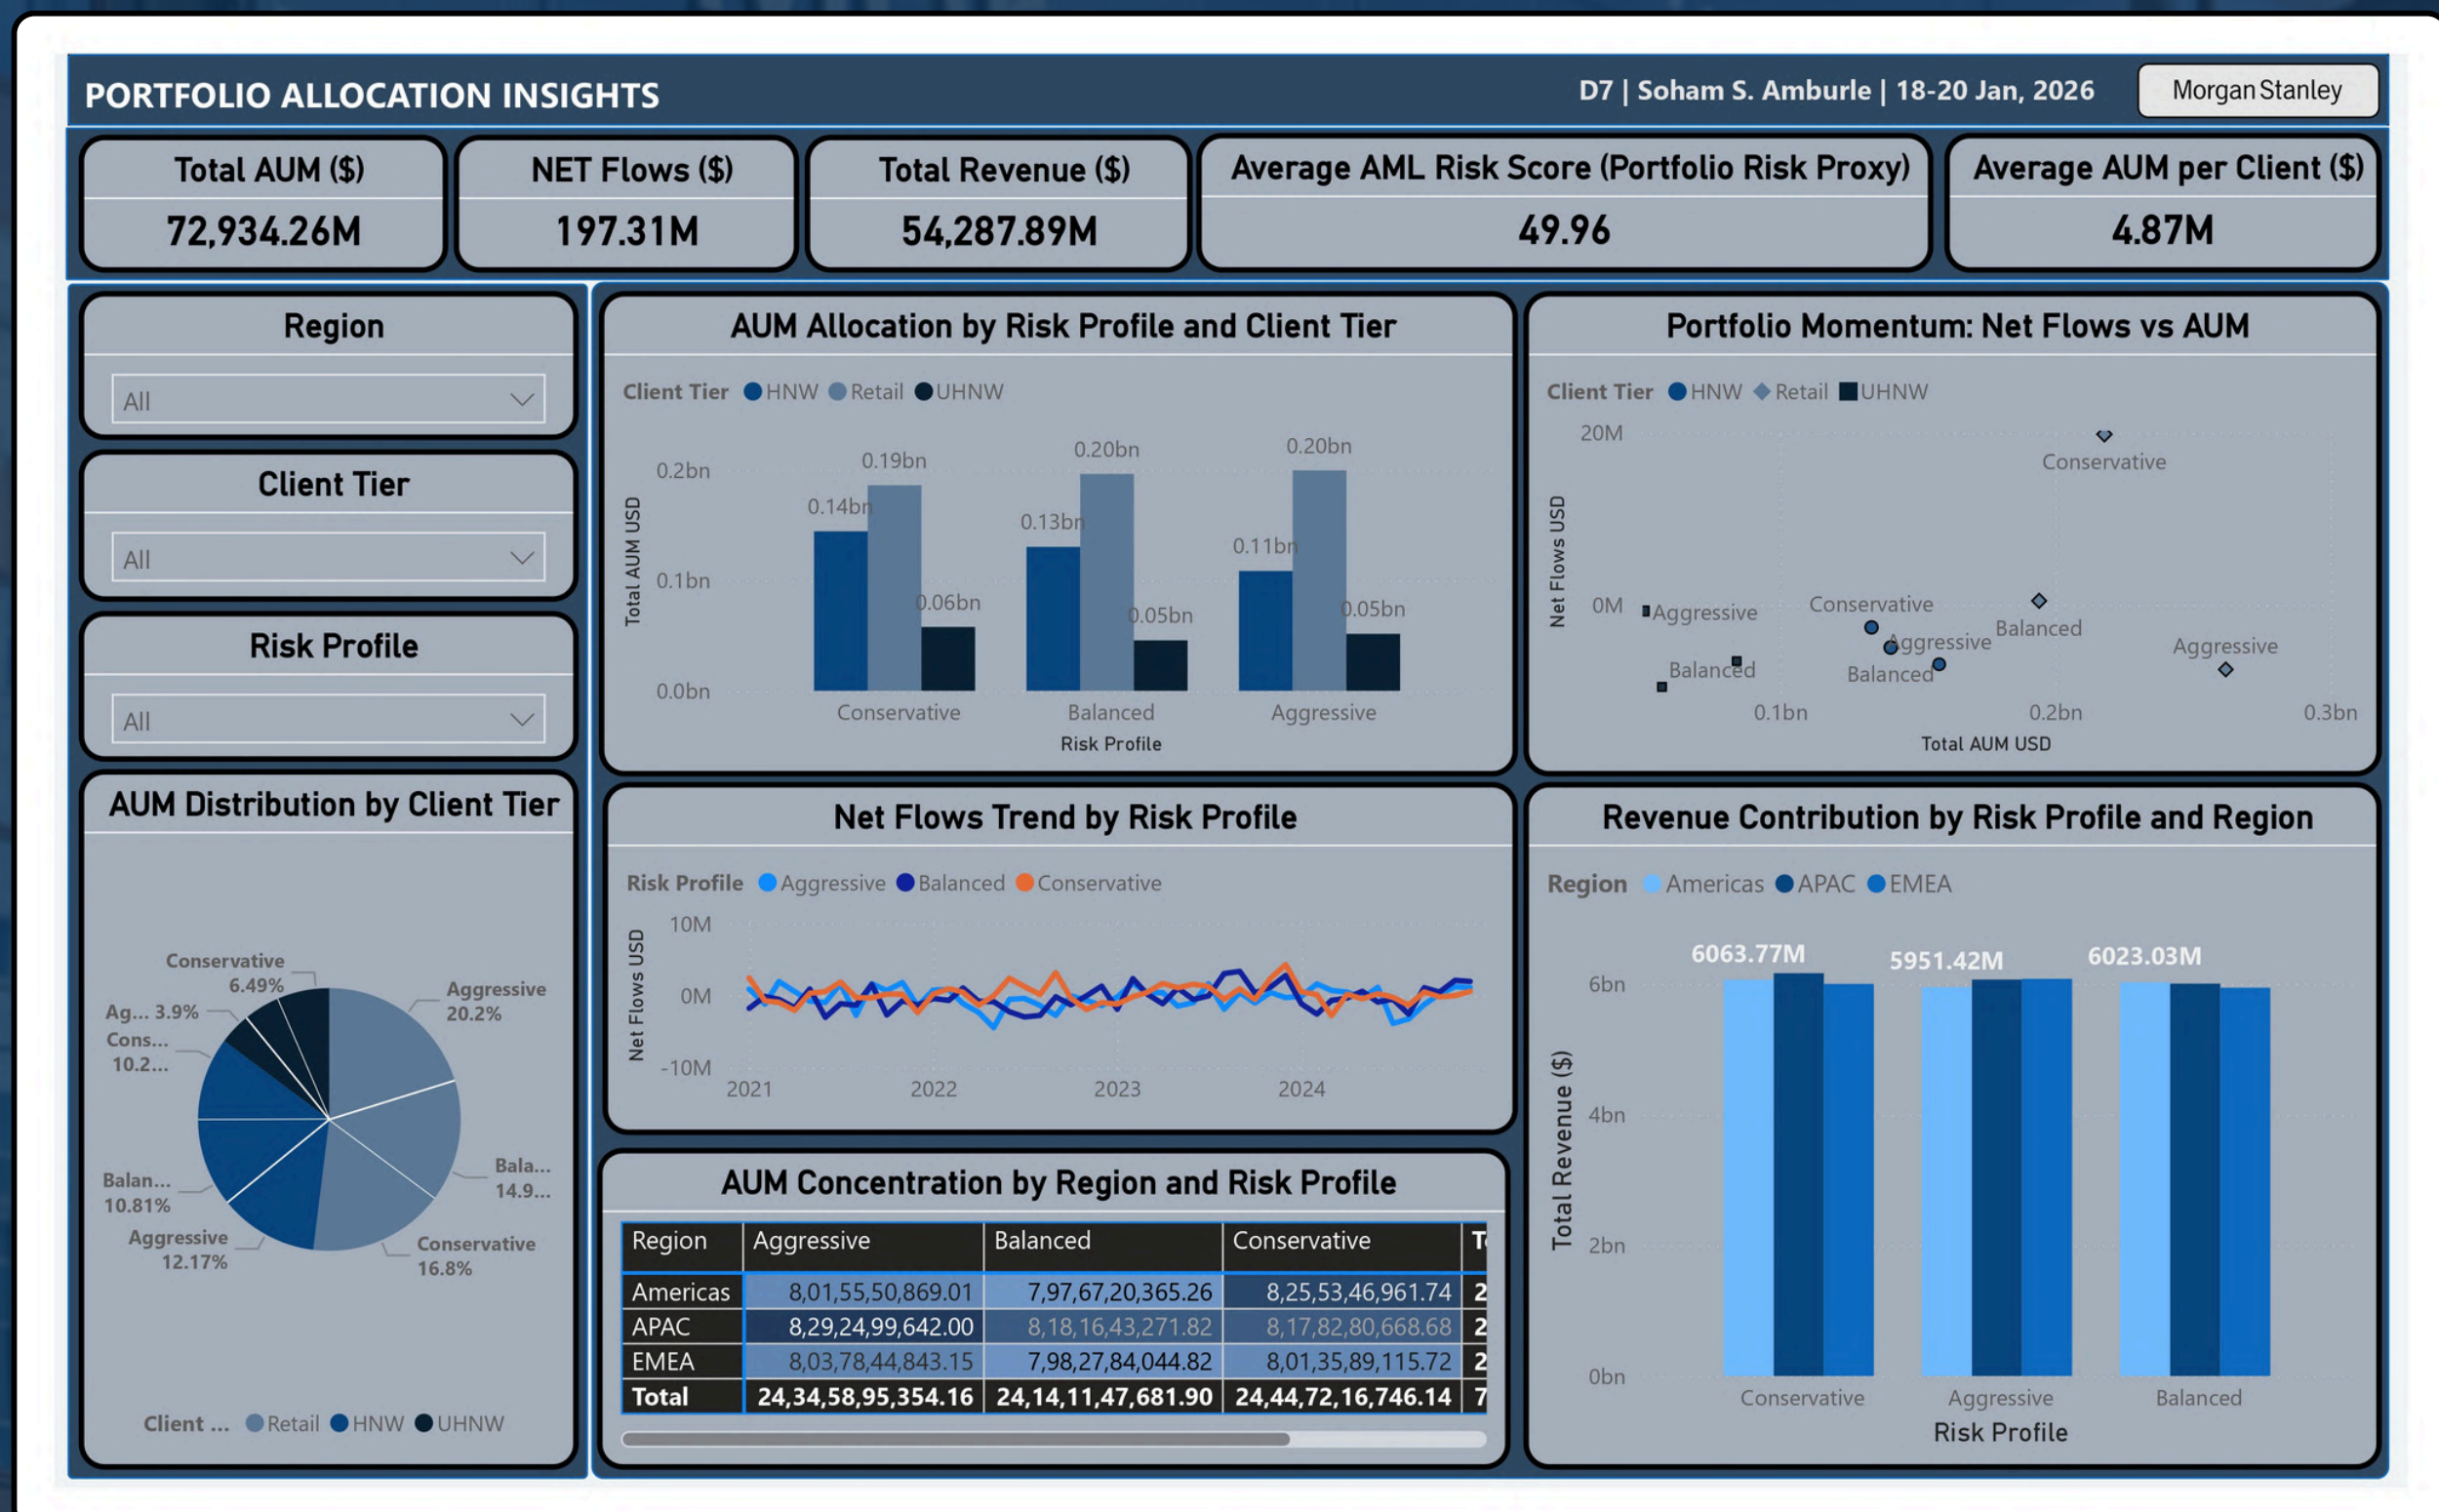

- Measures revenue and AUM productivity per advisor
- Compares performance across desks and regions
- Identifies efficiency gaps using cost-to-revenue metrics
- Tracks revenue and net flow trends over time

Primary stakeholders

- Business and operations leadership
- Desk and team managers
- Performance and workforce analytics teams
- Strategy and resource allocation teams

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

7. Portfolio Allocation Insights

This dashboard presents portfolio composition, capital allocation patterns, concentration risk, and risk-return alignment.

What this dashboard enables

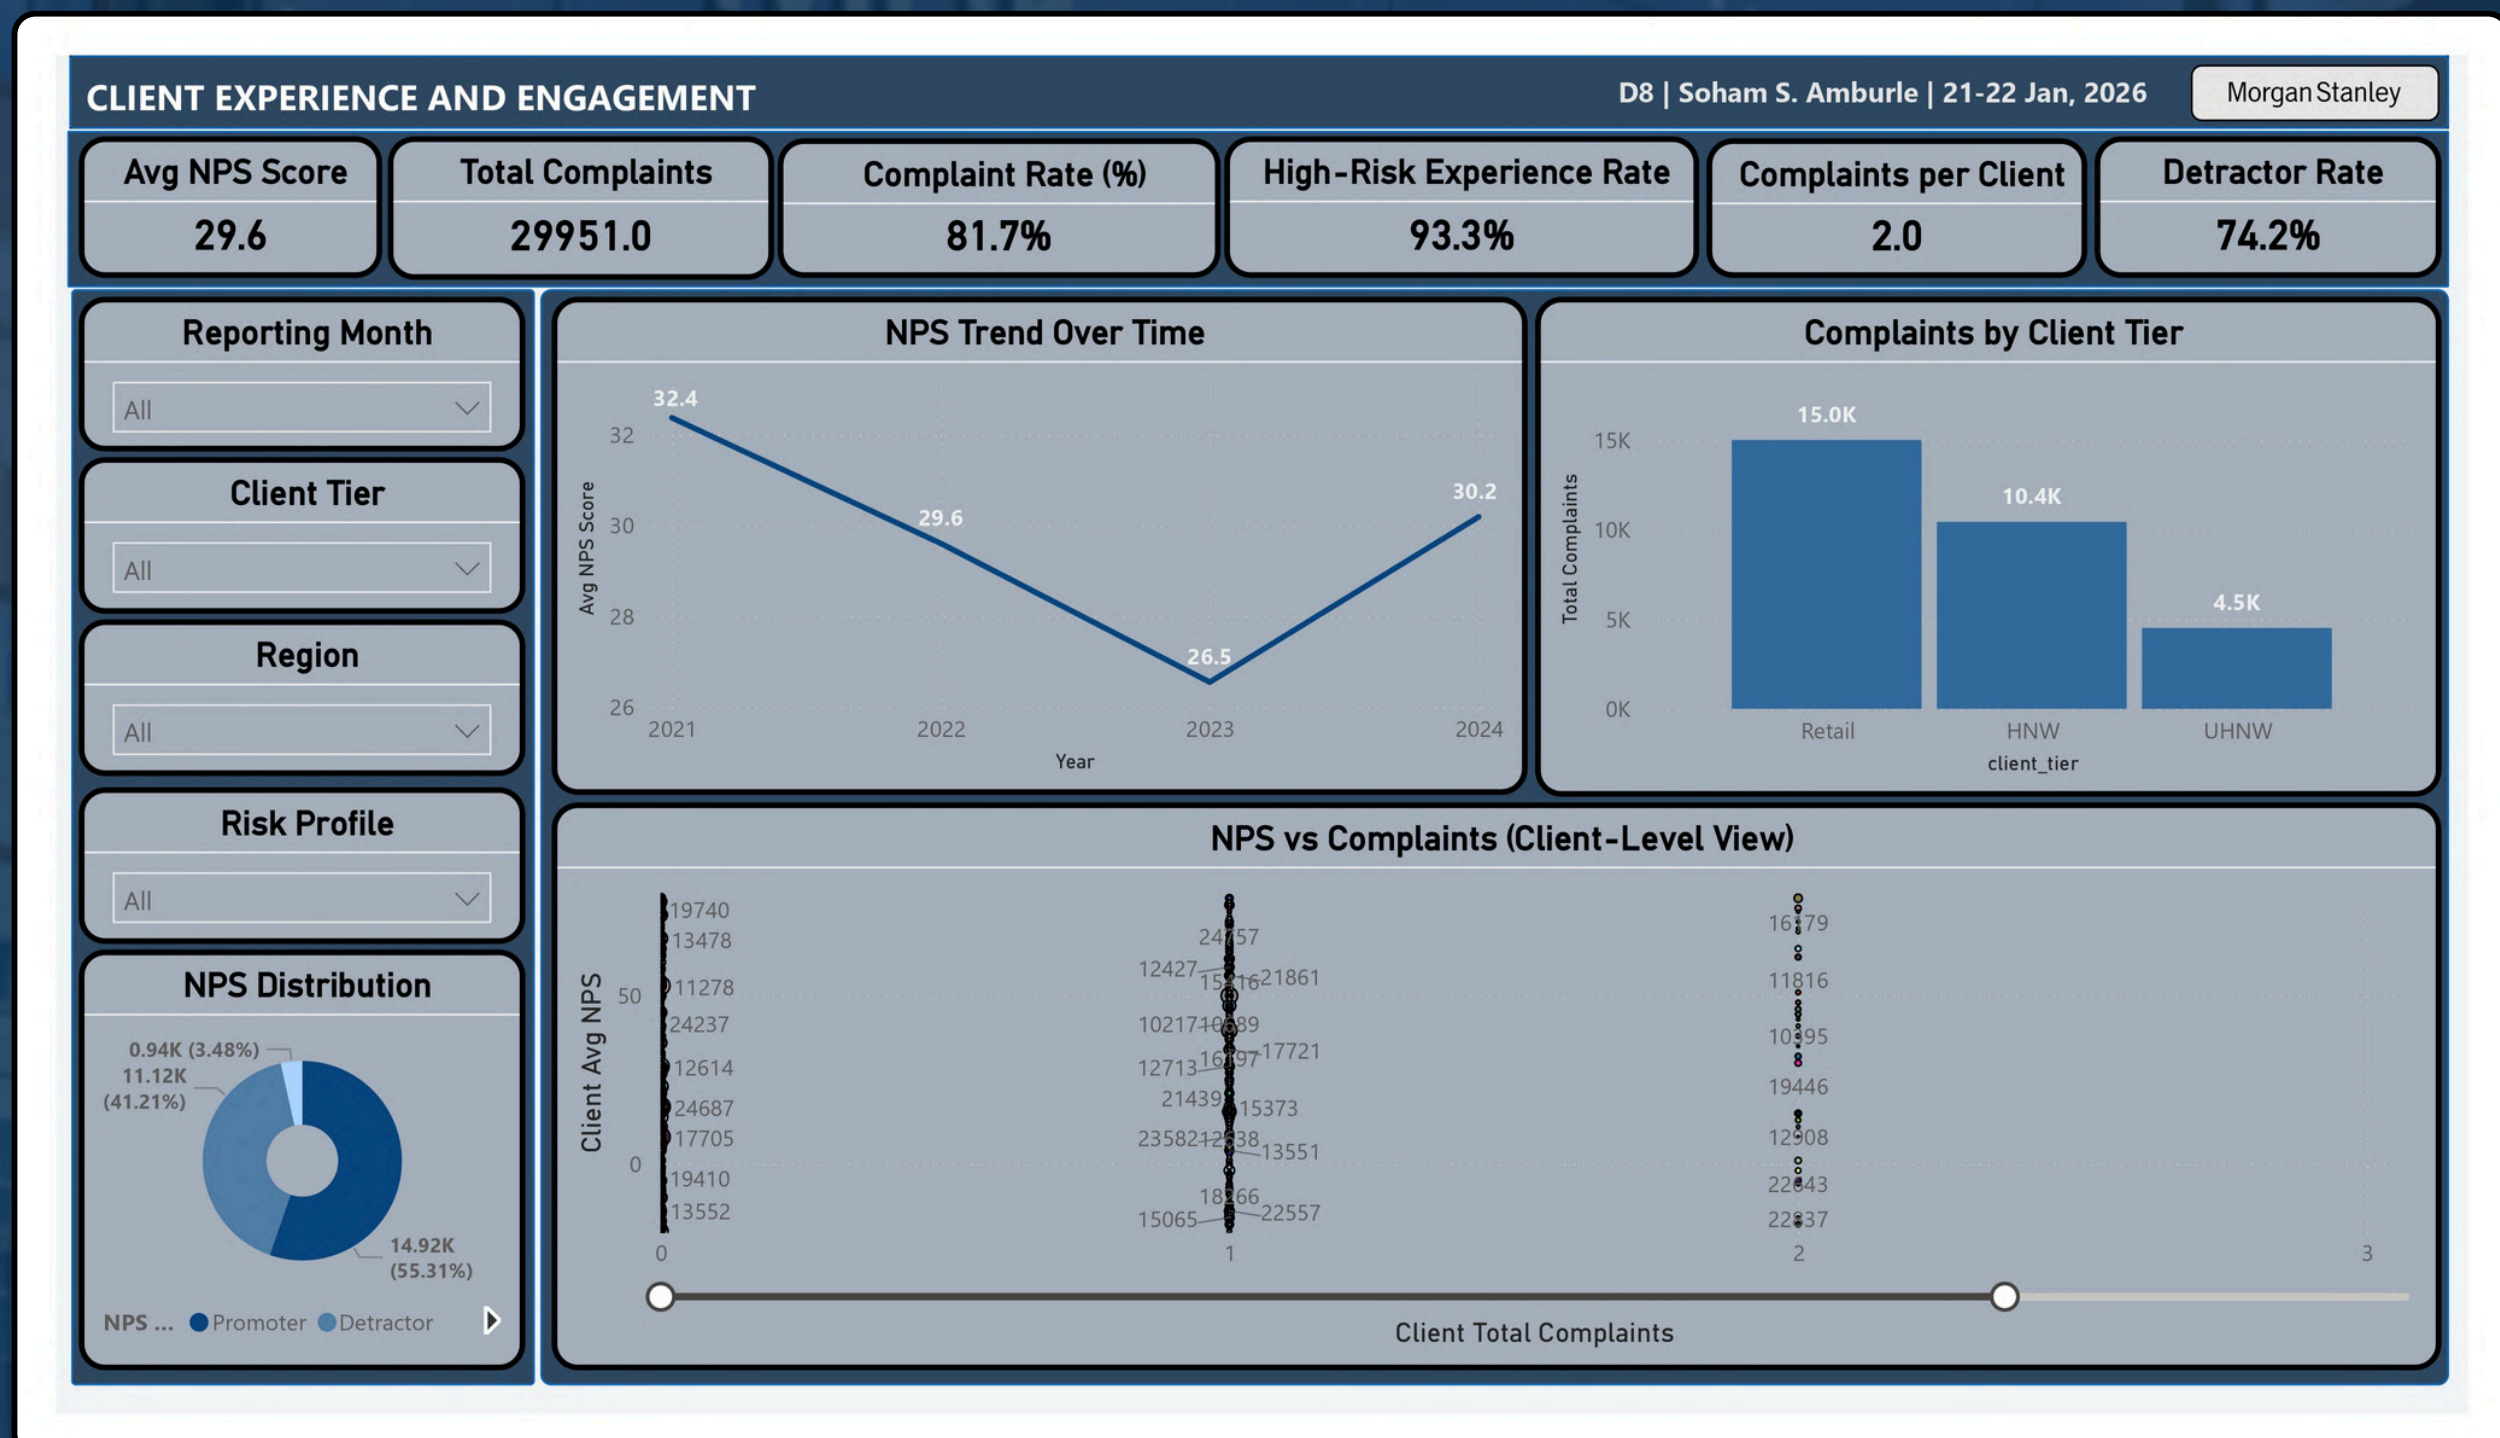

- Analyzes asset allocation across risk profiles and client tiers
- Identifies portfolio concentration and diversification gaps
- Monitors capital flow momentum and early risk signals
- Evaluates risk-return alignment across regions

Primary stakeholders

- Portfolio managers
- Risk and compliance teams
- Wealth management leadership
- Strategy and capital allocation teams

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

8. Client Experience & Engagement

This dashboard presents client sentiment, engagement quality, complaint patterns, and retention risk indicators.

What this dashboard enables

- Tracks client satisfaction using NPS trends
- Monitors complaint volume and complaint intensity
- Identifies high-risk experience segments
- Detects early warning signs of client churn

Primary stakeholders

- Senior leadership
- Client experience and CX teams
- Relationship managers
- Risk and service quality teams

An end-to-end Power BI analytics suite covering executive performance, revenue, risk, clients, and operations
This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

9. Compliance, AML, and Operational Risk

This dashboard presents compliance incidents, AML exposure, high-risk client concentration, and operational risk metrics.

What this dashboard enables

- Monitors compliance incident trends over time
- Identifies high-risk clients and segments
- Assesses AML risk relative to revenue exposure
- Evaluates operational cost as a proxy for operational risk

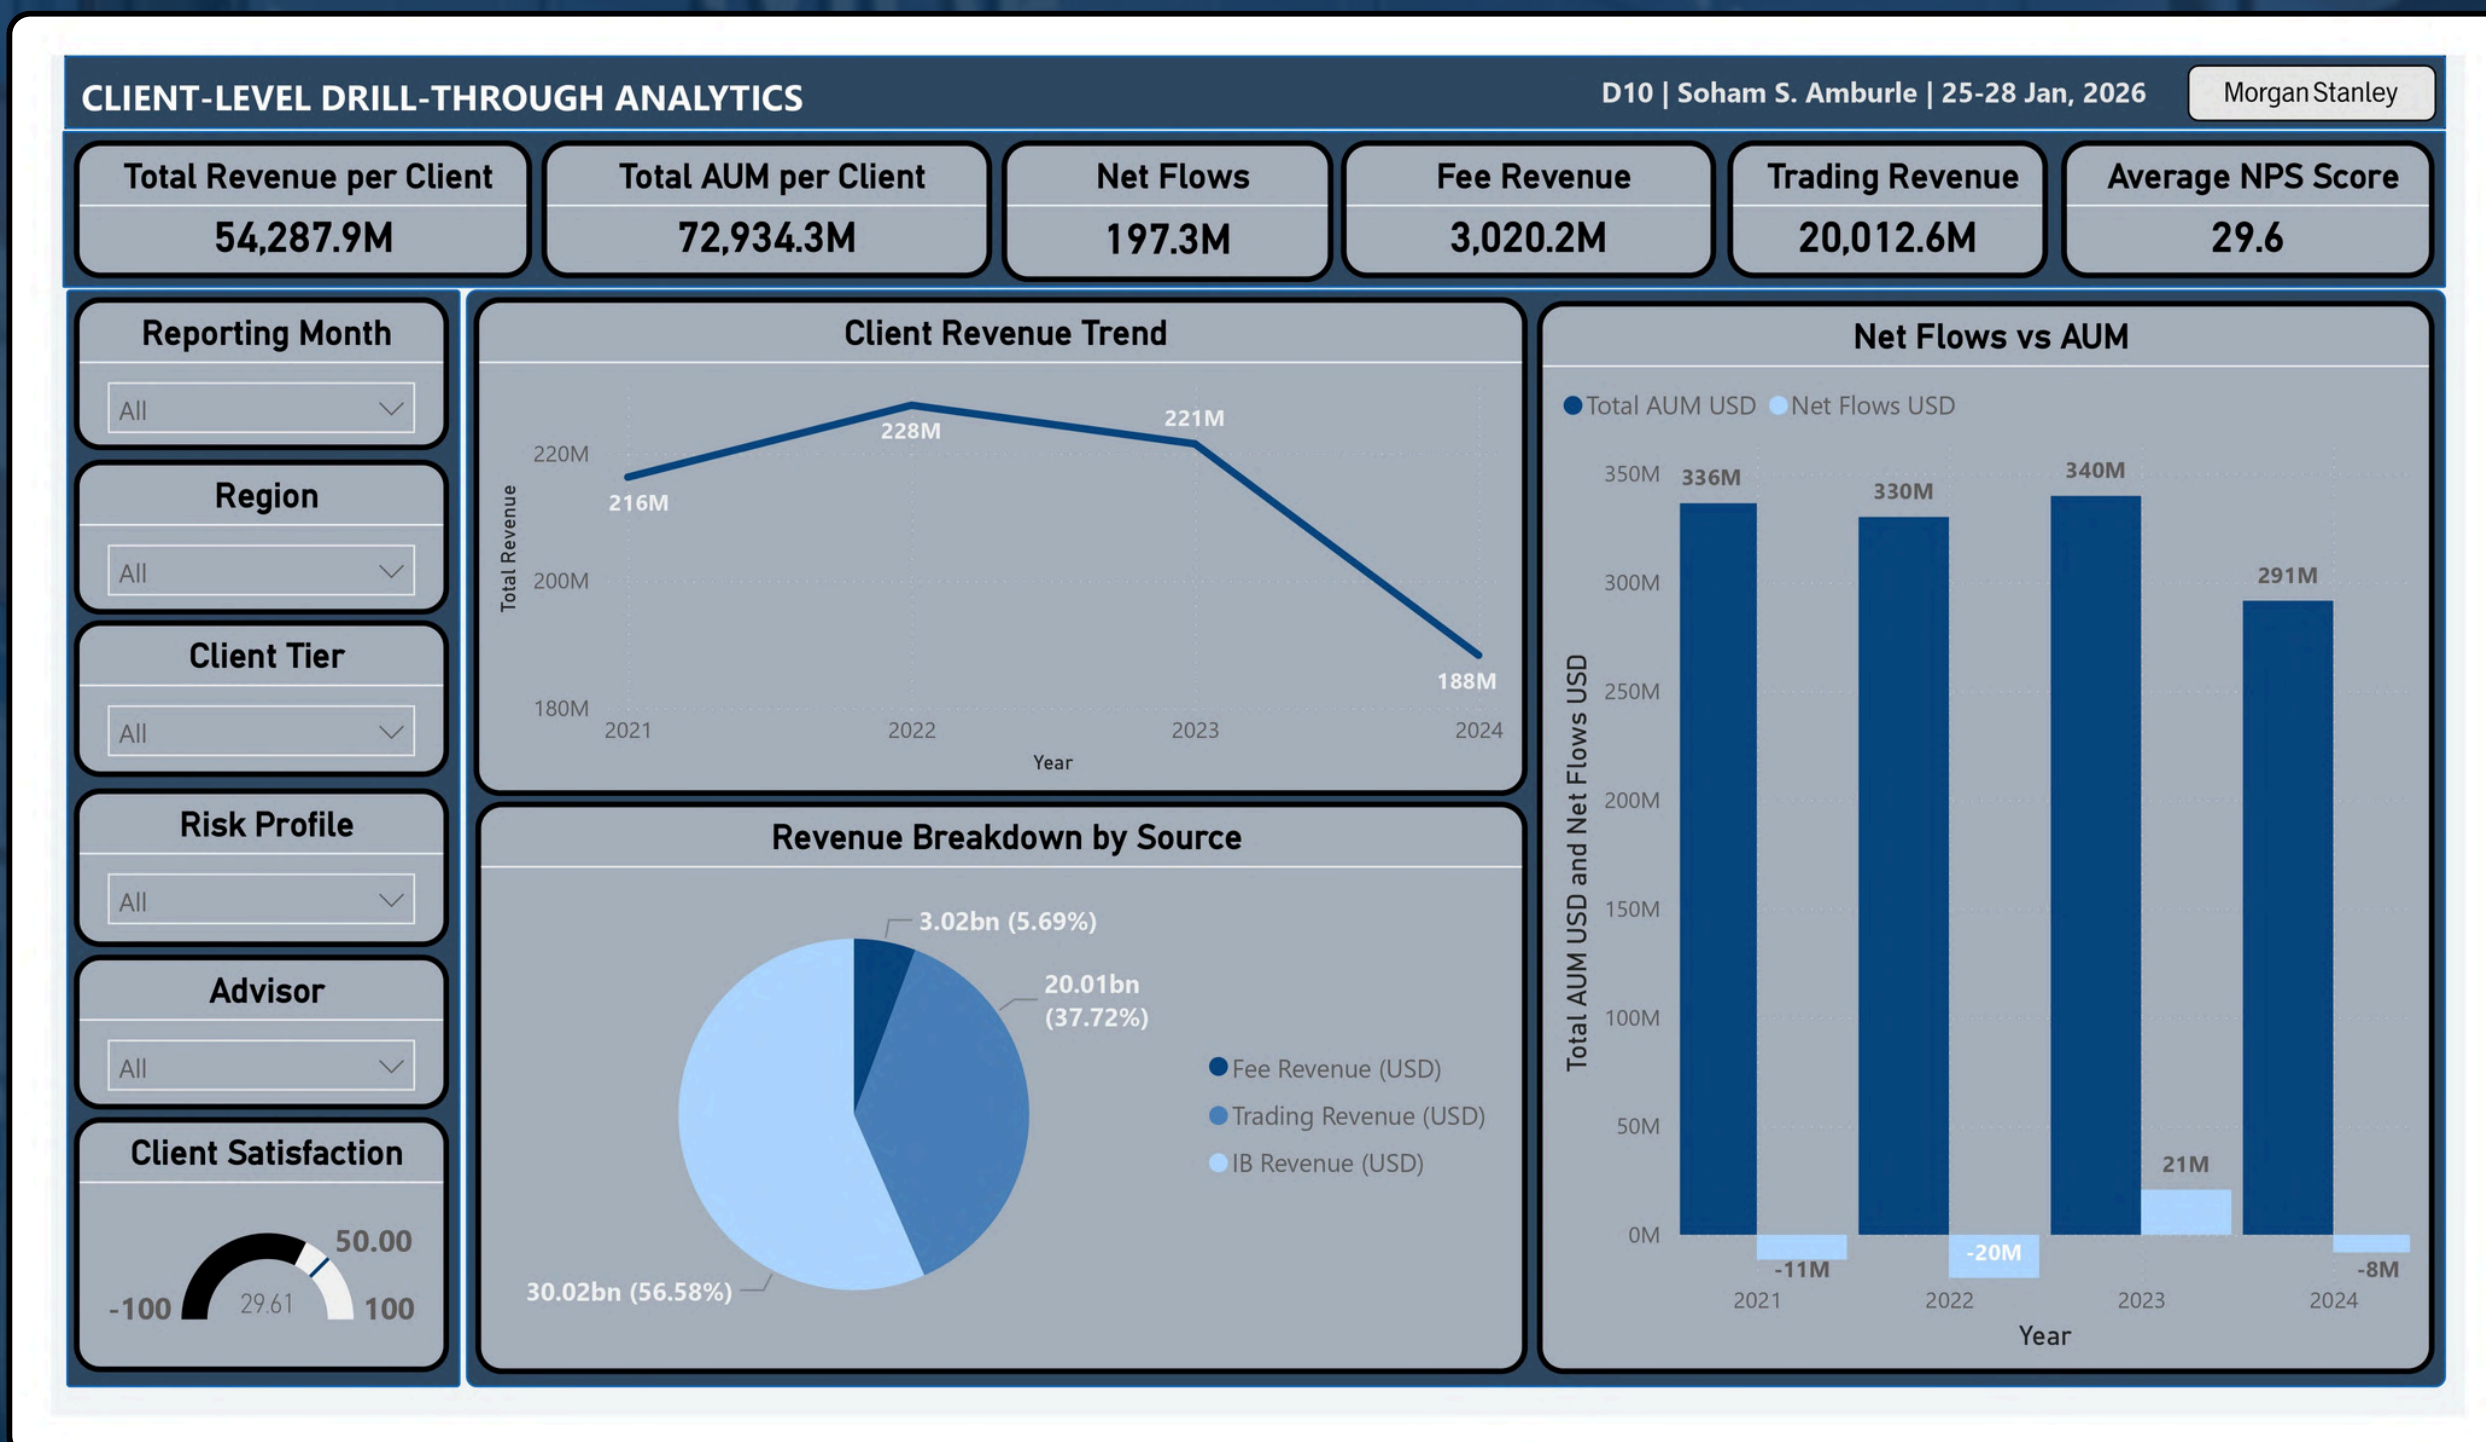

Primary stakeholders

- Risk and compliance leadership
- Operational risk teams
- Senior management
- Regulatory and governance functions

10. Client-level Drill-through Analytics

This dashboard presents granular client-level insights across revenue, assets, flows, and engagement.

What this dashboard enables

- Tracks individual client revenue and asset trends
- Analyzes revenue composition by business line
- Monitors net flows and portfolio momentum
- Evaluates client satisfaction and engagement health

Primary stakeholders

- Relationship managers
- Wealth management and advisory teams
- Senior leadership
- Client strategy and retention teams

This project delivers a unified, executive-ready analytics framework connecting growth, efficiency, risk, and client outcomes across the firm.

From Insight to Impact

What this analytics suite demonstrates

- Enterprise-wide visibility across growth, efficiency, risk, and client outcomes
- Executive-ready dashboards with intuitive navigation and drill-down architecture
- Risk-aware, client-centric decision support aligned with business priorities
- Scalable Power BI solutions designed for leadership and operational use

Tools, Skills & Capabilities

- Power BI | DAX | Data Modeling
- Business & data understanding across financial services domains
- Executive KPI design, analytics storytelling, and insight communication
- Documentation, stakeholder-ready reporting, and presentation design
- Microsoft Word | PowerPoint | Canva
- Financial, risk, and client intelligence
- Enterprise dashboard and analytics architecture

You can also access the GitHub repository for this project via the link provided there.

The screenshot shows a LinkedIn profile for Soham Amburle, a Business Intelligence Analyst. The 'Projects' section features a project titled 'Morgan Stanley | Enterprise Financial Intelligence (Power BI)' from Dec 2025 to Jan 2026. The description states it's an enterprise-level Power BI project simulating a 10-dashboard analytics suite for Morgan Stanley using synthetic financial data. Below the description are skill tags for Business Intelligence (BI), Business Analytics, and +5 skills. A row of six thumbnails follows, including a LinkedIn profile picture, a Morgan Stanley logo, and several Power BI dashboard screenshots.
