

Morgan Stanley – Executive Financial Performance and Growth

Documentation by Soham S. Amburle | 29 – 30 January 2026

The Executive Financial Performance and Growth Dashboard provides a top-level, enterprise view of Morgan Stanley's financial performance across revenue, assets under management, net flows, efficiency, and risk metrics. Using a synthetic financial dataset, the dashboard focuses on monitoring firm-wide revenue trends, evaluating asset and cash flow dynamics, assessing revenue yield and cost efficiency, and tracking AML risk exposure.

Designed in Power BI, this dashboard is intended for senior leadership, strategy teams, operations heads, and portfolio managers to gain a consolidated view of enterprise growth, efficiency, and risk-adjusted performance.

Through a combination of executive KPI cards, trend lines, stacked column and bar charts, scatter plots, and interactive navigation buttons, the dashboard delivers actionable insights into revenue performance, asset dynamics, efficiency, and risk at the enterprise level.

Executive Storyline

The Executive Financial Performance and Growth Dashboard presents a structured, top-level narrative of enterprise financial performance, highlighting trends, growth drivers, regional and segment contributions, efficiency, and risk-adjusted metrics.

The analysis begins with six KPI cards providing an executive snapshot:

- **Total Revenue (USD):** Aggregate firm revenue for the selected period, establishing the scale of the business.
- **Total AUM (USD):** Total assets under management, reflecting client wealth managed by the firm.

- **Net Flows (USD):** Net capital inflows or outflows, indicating client engagement and confidence.
- **Revenue Yield:** Revenue generated per unit of AUM, showing monetization efficiency.
- **Cost Ratio (%):** Operational cost relative to total revenue, measuring cost efficiency.
- **Average AML Risk Score:** Average AML risk exposure weighted by revenue, providing a risk-adjusted view of enterprise performance.

These KPIs provide a baseline understanding of enterprise scale, growth, efficiency, and risk exposure before deeper trend and composition analysis.

The dashboard also serves as a central navigation hub, linking to all other dashboards in the project:

1. Wealth Management Performance
2. Investment Banking Revenue and Pipeline
3. Trading Performance and Market Risk
4. Client Profitability and Lifecycle Analysis
5. Advisor and Desk Productivity
6. Portfolio Allocation Insights
7. Client Experience and Engagement
8. Compliance, AML, and Operational Risk
9. Client-Level Drill-Through Analytics

This ensures that executives can seamlessly explore detailed, domain-specific dashboards for deeper analysis while maintaining a holistic enterprise-level perspective.

Visuals and Description -

1. **Cards (KPI Indicators):** Six cards provide an executive overview of key financial performance metrics:
 - **Total Revenue**
 - **Total AUM**
 - **Net Flows**
 - **Revenue Yield**
 - **Cost Ratio**
 - **Average AML Risk Score**
2. **Slicers:** Enable dynamic filtering of all visuals by:
 - **Reporting Month:** track trends over time
 - **Year:** annual performance view
 - **Quarter:** quarterly dynamics
 - **Region:** geographic contribution
 - **Client Tier:** segment-level insights
3. **Total Revenue Trend (Line Chart):** Visualizes month-over-month shifts in total revenue, highlighting growth patterns and overall financial momentum.
4. **AUM & Net Flows Trend (Line / Combo Chart):** Tracks assets and net flows together, showing trends in client capital, engagement, and portfolio growth.
5. **Revenue by Business Line (Stacked Column Chart):** Breaks down revenue across Fee Revenue, Trading Revenue, and IB Revenue, helping executives understand what drives total revenue.
6. **Revenue by Region (Horizontal Bar Chart):** Highlights geographic contribution to total revenue, revealing regional performance and concentration.
7. **Revenue vs AML Risk (Scatter Plot):** Maps total revenue against average AML risk, with bubble size representing AUM and color indicating region or client tier. Supports risk-adjusted performance assessment.
8. **Cost-to-Revenue vs Revenue (Bar Chart):** Shows operational efficiency relative to revenue, helping identify regions or segments that are high-cost or less efficient.
9. **Navigation Buttons (Vertical Strip):** Provides quick access to all other dashboards in the analytics suite:
 - Wealth Management Performance
 - Investment Banking Revenue and Pipeline
 - Trading Performance and Market Risk
 - Client Profitability and Lifecycle Analysis
 - Advisor and Desk Productivity

- Portfolio Allocation Insights
- Client Experience and Engagement
- Compliance, AML and Operational Risk
- Client-Level Drill-Through Analytics

This dashboard enables Morgan Stanley stakeholders to:

- Monitor total revenue, AUM, and net flows for a consolidated view of firm performance
- Assess revenue composition by business line and region
- Evaluate monetization efficiency, operational cost, and risk-adjusted performance
- Identify high-performing regions or segments and areas requiring operational attention
- Navigate seamlessly to other dashboards for detailed, drill-down analysis

By combining executive KPIs, trend analysis, composition charts, scatter plots, and navigation controls, the dashboard provides a holistic, executive-ready view of enterprise financial performance, supporting strategic decision-making, resource allocation, and risk-aware growth management.
